Board Members Wanted

For the next semester we are looking for new board members. Many ressorts have to be filled, therefore we are looking for many committed students who want to work with us. The following ressorts are vacant:

- Presidium
- Vice presidium
- Internal university policy
- External university policy

- Activities
- Editorial office

If one of these departments appeals to you or if you have any other questions, please contact us at vorstand@aiv.ethz.ch or come to a board meeting without obligation. This takes place every Thursday at 11:35 in HXE C23. Otherwise you can meet us in G15.

Survey Sustainability In Teaching

Dear members of AIV

We need your opinion on a certain topic once again. So please fill out the following survey (consists of only four questions). It is about the following:

The SSC (Student Sustainability Committee) approached us and said that we in particular, as prospective civil engineers, will have a great influence on the topic of sustainability. We noticed that in the Bachelor's degree, due to the block structure, there is no possibility to choose specific subjects regarding sustainable construction (apart from the GESS subjects). Now the idea came up to write down a note in the guidelines of the master studies, where you can choose the subjects relatively arbitrarily. This could contain, for example, that it is recommended to attend some of the lectures that focus on sustainable construction. These lectures would then be listed. Due to the fact that the Bachelor is already very fixed, we do not want to introduce additional compulsory subjects in the Master as well, which is why we find this solution the most suitable.

Before we pursue this idea further, we would like to know if this is in your interest.

By clicking [this link](#), you will get to the survey.

Thank you for your support. 😊

Masterreise Rooftopbar

A blue circular badge in the center reads 'PUB QUIZ' with an exclamation mark and question mark, and 'Do. 27.4'. Text on the right specifies the schedule: 'AB DEM 27. APRIL BIS ZUM 23. Results Equality Monitoring 2022

We would like to inform you about the results for the [Equality Monitoring 2022](#) in which the latest data about the situation of equality and diversity at ETH Zurich is published.

Every year, besides the report for all of ETH Zurich, data **for each department** is also published. Because it is only through the actors within universities that real change can be created, we hope this information will stimulate discussion and contribute to further progress in gender equality and diversity work within the departments as well. Take a look at the situation in your department specifically and feel free to get in touch with ETH Diversity if you have further questions.

Data creates awareness, and spreading such information creates transparency.
